Bachelor in Business Administration Program

Description

The Bachelor in Business Administration program at Villa Maria College offers students an opportunity to develop themselves as well rounded business professionals, with a passion for timely and relevant business knowledge. Through course work that emphasizes general management principles, critical thinking and analysis, and problem solving skills, students will engage in business theory and application, in and out of the classroom. A broad liberal arts base will expose the student to a variety of subjects and foster an appreciation for diversity in the marketplace. The desired outcome is for students to be able to decipher, analyze and effectively communicate ethical business solutions.

This program offers a general business administration degree with a 60 credit core that emphasizes the five key areas of business: accounting, marketing, finance, management, and international business. Quantitative courses emphasizing math and decision making round out the core as well as a plethora of business electives. The remainder of the program remains open and flexible for the student as general elective choices. These general electives can taken in subjects outside of business based on individual students interests. With advisement the general electives can be grouped into minors, such as music industry, graphic design, or merchandising, and can be a competitive advantage for students as they enter the marketplace.

A business program is a core offering at most colleges; our Bachelor of Business Administration uniquely fills the needs of Villa Maria’s students and is a necessary piece of the college’s bachelor degree offering.
